Cockroach Clean-Out Preparation Guide

To ensure safe, effective treatment, please follow these steps before your scheduled cockroach clean-out:

Kitchen & Bathroom Preparation:

- Empty all cabinets and drawers. Place all dishes, food items, and other contents in the center of the room, covered with a sheet or blanket.
- Clear countertops, stove tops, and sinks completely, then wipe them down to ensure a clean surface.
- Remove all items from the vanity and cabinets. Place these items in a separate room, covered with a sheet or blanket.
- Clear countertops and sinks in the bathroom and clean them thoroughly.
- Remove items from tubs as well.

Cabinet Cleaning:

- Wipe out all the kitchen and bathroom cabinets and drawers before our arrival.

Pet and Tenant Safety:

- All tenants and pets must vacate the property for at least 3 hours during and after treatment.
- Cover fish tanks with a damp towel and unplug aerators to ensure their safety.

Post-Treatment Cleaning:

- Upon returning home, wipe down food handling utensils, food prep, cooking, and eating surfaces.

Follow-Up Treatment:

- In 14 days, we will contact you to schedule your follow-up appointment for a complete and lasting pest control experience.

Important Reminder:

- Avoid using any over-the-counter pest control products as they can interfere with our treatment.

By preparing your home according to this, we'll be able to provide the most effective and thorough clean-out possible.

Thank you for your cooperation!
